## Foils

These aluminium containers are ideal for transporting & storing either hot or cold food. Popular with restaurants & takeaways because of their ability to retain heat, these foil containers are a simple & effective way to deliver fresh food. They are also freezable for storage & later consumption purposes.

Another feature that makes the aluminium material perfect for food is its robustness & reliability. Leak-proof, stackable & an extreme temperature resistance make this product an essential for takeaways, restaurants & canteens.

**Committed to developing chemicals that have minimal impact on the environment.**

Evans Vanodine have developed an innovative system for classifying each of our products according to their overall environmental impact.

The lower the overall product score, the lower the impact on the environment. Products which achieve a low impact rating are identified with a GreenTick logo on the label. Our system scores products based on eight different criteria:

Product in Use

Packaging Used

Hazard Class

PH Balance of Product

Raw Materials

Energy Used

Transportation

Water Used to Manufacture

## Super Concentrate Dosing Systems

The demand for improved efficiency and outstanding results has led Evans Vanodine to develop a range of chemical auto and manual dosing equipment systems. These focus on reducing your total cleaning operation costs, including energy and water consumption. They also reduce packaging waste and product consumption.

The Evans e:Dose super concentrated formulas and dispensing equipment provide exact dosing and safe handling for hygienically clean kitchens, washrooms, dishware, glassware and laundry.

### Eco Shot Manual Dosing

- Safe, accurate dosing.
- No chemical wastage.
- Cost control in your hands.

**C087AEV** Trigger Fill  
**C088AEV** Bucket Fill

The Eco Shot is an innovative, compact, push-pump chemical dosing unit, which delivers an accurate dose of concentrate product into bottles and buckets. The unit is easy to use, reducing waiting time for operatives. Dosage can be adjusted from 5 - 30ml, in increments of 5ml, delivering optimum cost in use.

No plumbing is required to install the Eco Shot, with no water line connection, giving you the freedom to install it wherever you need it.

The system can be complemented by a lockable cabinet, for safe, secure and spill free product storage, as well as easy identification of each product in use.

## Flat Mopping System

Flat mopping represents one of the most visible changes to mopping in recent years. Doing away with the traditional string mop head that many typically associate with the task, flat mopping involves cleaning floors with a flat rectangular frame affixed with a pad or cloth.

There are numerous different types of flat mop available, suitable for different floor types, stains and cleaning requirements, including disposable solutions and more abrasive mop surfaces, but microfibre remains the most commonly used material for flat mops.

Unlike most string mops, flat mops can be used for both wet mopping and dry mopping, making them a versatile and useful solution to a wider range of cleaning tasks.

### Nu Lady Combine Flat Mop/ Wringer Bucket
